Estate and Development - Communication Plan for major capital projects

Introduction

As widely reported both locally and nationally the University is making significant investment in its building and infrastructure to meet aspirations to build on its reputation for research and academic excellence. The majority of this investment will be delivered through a number large capital build projects that will be constructed over the next few years.

It is a very exciting time for the University and details of some of these major capital projects can be found on the Estates and Development Projects Web Page and the Campus Development Web Page.

We are sure it is of no surprise that the intensity and complexity of these projects will bring a level of disturbance to the Campus community that may not have been experienced before. The Estates and Development Directorate understand the critical importance of managing and co-ordinating these projects to reduce the negative impact on the University community and our neighbours.

A major step to reduce the impact of these works is the implementation of a site wide communication and co-ordination plan.

As a first step to help facilitate this site wide communication strategy Estates have produced this projects plan detailing individual site areas and commented on the anticipated commencement and completion dates for the various capital works that will be progressed. As the contracts proceed more detailed plans and narrative will be created to focus on any significant matters that will have an impact on the University. **Please keep a watch on these notices as they will be issued regularly to ensure that there is clear communication during a period where these contracts will start becoming very noticeable across the campus.**

Current & Upcoming Works

Please draw your attention to the areas highlighted in purple as these are the contracts which are either current or due to start imminently (within 3 weeks from this drawing's revision date). There is also a legend that can help you find specific projects and identify car park closures.
